EXPERIENCE

Software Developer I — *FieldEdge*

JAN 2019 - PRESENT

- Maintaining and fixing bugs in the existing web codebase written in Knockout.js
- Developing new UI features and components in the FieldEdge web application using Vue.js and C# with deployment on Microsoft Azure
- Migrating the UI codebase language from Knockout.js to Vue.js
- Collaborating with Product, Engineering, and QA to deliver DRY, responsive, and durable code
- Promoting quality by actively participating in requirements gathering, technical design reviews, etc
- Contributing to technical documentation and new developer onboarding materials

Marketing Specialist — *MemberClicks*

FEB 2017 - JAN 2019

- Bridged the gap between siloed departments by bringing the company together for weekly, monthly and annual events
- Wrote and published over 90 blog articles (via HubSpot) using Inbound Marketing techniques to promote sales for our three product lines
- Identified and connected with leading industry professionals to establish industry partnerships within the membership management field

PROJECTS

myBlendology – www.myblendology.com

PERN (PostgreSQL, Express, React, & Node) web app that allows users to create diffuser essential oil blends based on their choice of mood. Users can sign up and save their favorite blends to a unique user page.
