KRISSY CONANT

S O F T W A R E
D E V E L O P E R

ABOUT ME

I'm a full stack software developer who is inspired by my background in SaaS marketing, user experience, & sales.

I thrive when bridging the gap between product and engineering to build thoughtful, agile, code solutions that satisfy customers and improve upon the product.

TECHNICAL SKILLS

Day-to-day development tools: JavaScript, Vue.js, Knockout, HTML, CSS/SCSS, Bootstrap/Flexbox, C#, Azure, & GIT.

Occasional use: React & Node.js.

Dabble with: PostgresSQL, Python, AWS, & Heroku.

CONTACT ME

Location: Midtown, Atlanta, GA

WORK HISTORY

Software Developer
FieldEdge (Clearent) | Jan 2019 - Present
- Enhancing and building new UI features into our web-based application
- Collaborating with Product, Engineering, and QA to deliver DRY, responsive, and durable code
- Promoting quality by actively participating in requirements gathering, technical design reviews, etc
- Becoming a subject matter expert in our codebase and product

Marketing Specialist
MemberClicks | Feb 2017 - Jan 2019
- Wrote and published over 90 blog articles (via HubSpot) using Inbound Marketing techniques to promote sales for our three product lines.
- Identified and connected with leading industry professionals to establish industry partnerships within the membership management field.

FEATURED PROJECTS

myBlendology
www.myblendology.com
myBlendology is a PERN stack (PostgresSQL, Express, React, & Node.js) web application that allows users to create diffuser essential oil blends based off your choice of mood. Users can sign up and save their favorite blends to a unique user page. Deployed on Heroku.

Slopey Seconds
www.slopeyseconds.com
Slopey Seconds is a vanilla Javascript web application that combines multiple APIs (Google Maps, Powder Project, & Open Weather) to search for all ski/snowboarding trails in the US. Users can rate, review and retrieve trail knowledge (elevation, length, weather) based off their search.
